# Canadian Public-Sector Financial Management

Andrew Graham

“This is a magisterial book explaining the nuts and bolts of public sector financial management within a comprehensive framework of public policy. Graham displays a sophisticated understanding of how government actually works. Fads come and go and often at great cost to effective delivery but behind these fads is a set of basic financial skills that are essential to good government. This text covers them in a practical way that will prove useful to students of public management and to practitioners throughout Canada's public sector.”

Ian D. Clark  
President, Council of Ontario Universities

“It's not your money – it belongs to the people.” That simple axiom creates unique challenges for the management of public funds. Accountabilities are sharp. Interest in how funds are spent, in what manner and for what is high. The skills demanded of public sector managers in financial management are becoming more onerous and complex. For the public and students of public administration, sorting through how public funds are managed is often a challenge.

*Canadian Public Sector Financial Management* by Andrew Graham, School of Policy Studies, Queens University is a text designed to provide a foundation outline of all aspects of public sector financial management. It addresses the full range of such issues: how funds are obtained, what rules of accountability and accounting are applied, the control of public funds, effective management of budgets at the operational level and accountability and oversight.

This text is intended for those who wish to understand better how Canada's public sector manages the financial resources it is given. It is also helpful for students of public administration or those concerned with public financial management issues to obtain a basic understanding of all aspects of managing public funds. It is also of use to practitioners within the public sector who wish to better understand the financial responsibilities they have in their jobs.
