

Society of Conservation Biology  
Kingston Chapter  
Meeting Minutes  
11:30 AM

**November 20<sup>th</sup>, 2012**

### **Updates**

- Transition Kingston Camping from November 30 – December 2 if you are interested!
  - o They also had the meeting yesterday about Line 9
  - o They are going to send us a template for a declaration requests, so we would all be able to sign it (an environmental assessment should be necessary)
- Movie Night this Thursday at 7 00 PM in the EEB room
- Kingston Chapter is going to have a separate Line 9 link, so we should think about having one on our website
- If you have not paid your \$5 membership please bring your money to Manisha!
- If you want to join QBAC, the meetings are Thursday at 5 30 (not this week though!)

### **Feature Creature**

Aye-Aye

- Maurice from Madagascar movie!
- A Lemur – world's largest nocturnal primate
- Distinct social system
  - o Females have distinct ranges and will not cross one another
- They use echolocation and they use their elongated fingers to tap on trees to find prey
- Ancient legend where the Aye-Aye was a symbol of death, so the people would kill them

### **Photocontest**

- Went around last Tuesday and collected
- Maybe use coupons for the 10% off as the first 50 people to submit a photo
- Want to sell the Christmas cards next week next Wednesday-Friday
  - o Going to get a quote from the printers
- Going to context the Robert Bateman Society this week

### **Sustainability**

- Want to package the seeds to sell with the cards
- We have the envelopes that we can use - Try and get labels

### **Social**

- Want to do something fun at the Grad club and have trivia questions
- Early January

### **Fish and Frogs**

- Going to call schools and start getting ready for next semester

### **Issues**

- “Save Our Tots” campaign
- Stop the mega-quarry campaign
- Save our tots – it is because this is where a lot of our potatoes come from
- Land would be used for farming that feeds about 1/12 of the GTA
